## PG Diploma Course in Environmental Management System (ISO 14001) (PGDEMS)

Weekend Program

PG Diploma Course in Environmental Management System - ISO 14001) (PGDEMS) is designed to provide hands on knowledge on the basic elements to implement and manage an Environmental Management System (EMS) as specified in ISO 14001. During this training course, the will be able to understand the different modules of an EMS, including EMS policy, procedures, performance measurements, management commitment, internal audit, management review and continual improvement.

All elements of ISO 14001:2015 are covered in detail in the diploma program with examples to help students to understand how an environmental management system can be implemented to achieve conformity with the standard and obtain ISO 14001:2015 certification.

### Course Objectives

- To understand the elements and operations of an Environmental Management System and its principal processes
- To acknowledge the correlation between ISO 14001 and other standards and regulatory frameworks
- To understand the approaches, methods and techniques used for the implementation and management of an EMS

### Target Groups

- Individuals involved in Environmental Management
- Individuals seeking to gain knowledge about the main processes of Environmental Management Systems (EMS)
- Individuals interested to pursue a career in Environmental Management
- Environment Consultants, Engineers, Manager, EHS Officers
- Professionals preparing for certification to ISO 14001:2015

### Eligibility

- Graduation in any stream.
- Work experience, although not necessary, but of a minimum of two years in the relevant field is desirable.
