

# CERTIFICATE IN QUALITATIVE RESEARCH FOR EDUCATIONISTS

The 'Certificate in Qualitative Research for Educationists' is of six months duration. The certificate is designed to develop amongst the participants the understanding of the basic differences between quantitative and qualitative research paradigms, the criteria that determine the quality of research, the connections and the interdependency of the two research paradigms and the data assimilation, management and analysis techniques.

## AIMS & OBJECTIVES

At the end of the course, the participants should be able to:

- Identify a research problem.
- Develop a research question.
- Plan qualitative research methodology for exploring the research questions, and be aware of the criteria that shall establish the quality of their research.

## BENEFITS

- An outcome based course leading to a publication in 6 months.
- Important concepts related to Qualitative Research thoroughly covered.
- Field activities and assignments that help develop essential skills and clear key concepts.

## ELIGIBILITY
