

Diploma in Humanitarian Crisis and Pharmacy

Introduction:

Humanitarian crises such as natural disasters, armed conflicts, and complex emergencies pose significant challenges to healthcare systems globally. Pharmacists play a critical role in providing essential medicines, managing pharmaceutical supply chains, and ensuring access to healthcare services in crisis-affected areas.

Key Highlights:

- Understand the critical role of medicine distribution and pharmacists in global humanitarian efforts, ensuring access to essential medicines and supplies.
- Gain expertise in managing pharmaceutical services in crisis settings.
- Develop strategies for emergency preparedness and disaster response.
- Learn about ethical and legal frameworks governing humanitarian work.
- Practical exposure to case studies from real-world humanitarian interventions.
- International Faculty will take lectures.

Eligibility:

Open to candidates with 16 years of education. pharmacists, pharmacy technicians (16 years of education), medical professionals, allied health professionals, and public health disciplines are encouraged to apply.

Fee Structure:

- Tuition: 60,000 PKR per semester
- One-time admission fee: 15,000 PKR
