

# Diploma in Pharmacy in One Health

## Introduction:

The **One Health approach** recognizes the interconnectedness of human, animal, and environmental health, particularly in addressing public health threats such as zoonotic diseases, antimicrobial resistance, and environmental degradation. This **Diploma in Pharmacy in One Health** provides pharmacists and healthcare professionals with the knowledge and skills to apply the One Health approach in their practice. By integrating human, veterinary, and environmental health, participants will be equipped to develop holistic health solutions and contribute to global health security.

## Key Highlights:

- Understand the One Health approach and its significance in global health.
- Gain knowledge in zoonotic disease prevention, antimicrobial resistance management, and environmental health.
- Develop interdisciplinary collaboration skills, working across human, animal, and environmental health sectors.
- Practical exposure through case studies, fieldwork, and real-world application of One Health principles.

## Eligibility:

Open to candidates with 16 years of education. pharmacists, pharmacy technicians (16 years of education), veterinary technicians, environmental scientists, medical professionals, allied health professionals, and public health disciplines are encouraged to apply.

## Fee Structure:

- Tuition: 60,000 PKR per semester
- One-time admission fee: 15,000 PKR
